Subject : DETI RHI - conversation with Peter Hutchinson
Paget, Mark

I spoke to Peter Hutchinson this afternoon about the draft final DETI RHI report. He is satisfied with the structure and that it covers everything it needs to, although of course he had a few comments. He expects to send written comments early next week. He (and Sam Connolly) are also keen to see the model, and I said this would be available early next week. He seemed happy with that.

Specific actions from our call:

1. He and Sam would like to have a video-conference with us to be talked through how to work the model. No firm date, but perhaps the week after next? I will be away but Paget you are the expert anyway so if you're happy to go ahead without me that's fine.
2. He thought that he would probably want a call to talk through the report's conclusions at some point. We may well want to combine this with (1).
3. He is still keen to think about some form of incentive for one or two sites in the large industrial sector. I suggested including ½ page in the report text (I can write it this afternoon) and then showing him and Sam how to calculate this with the model, as part of the training (see 1). He seemed fine with that.
4. Paget – can we lift from the model what capacity “small”, “medium” etc are for each technology, and drop it into the report?

As far as next steps are concerned, it's a case of:

1. Finalising the model checks and corrections. **Mark** – do you want to review before it goes?
2. Waiting for DETI's specific written comments, finalising the report and sending it off.
3. Getting AEA to formally confirm that they are happy for their part of the model (much of the input data) to go to DETI. Can't see what objection they could have, but it's a box that needs to be ticked. I have asked Oliver to confirm.
4. Organising a model training/ final discussion call as above.

I am on holiday as of tomorrow night for two weeks, but contactable if needed (Irish mobile - 00 353 86 222 4115). I could spend a few hours next week addressing comments. **Paget** – sorry, would you mind watching out for the comments, and then arranging the VC training session?

Thanks

Iain Morrow
