Chris

Any progress on the batteries from Wrightbus yet. Is there anything we can do at CAFRE to help?.

Regards

Good afternoon Garrett,

Progress of this is dependant upon money, more precisely funding being available and this is our current direction. In the meantime we hope to liaise with yourselves on the possibility of a pilot programme involving the use of these batteries.

I will be in touch.

C

Just wondering about the spare batteries from Wrightbus and whether the UFU have made any headway in potentially using these for energy storage on farm? Talk soon
