David

Had a quick look at this and seems ok. I might have shown a slightly longer pay back just to keep you safe and I might also have mentioned about improved bird welfare, but I can understand why you don't

At Oxford and hear Janet is been given a special little reception here tomorrow on the fringes of the Conference

John

Subject: Could you sense check this brief update

Hi John

Happy New Year – hope 2014 is a great bounce back for you and yours !!!!

We are doing a brief update flyer for existing growers over a number of areas – could you sense check this biomass piece – its just to get them thinking!

It will be type set etc before issue

Many thanks

David

-
- **Biomass Heating and the Government Renewable Heating Incentive** – this program pays an incentive for heating using renewables rather than oil based fuels (in our case mainly LPG)

-Moy Park will support existing growers to install indirect Hot Water Heating (roof mounted radiator based system) to replace Brooders with a support package of 100% AHP for approved costs on any existing **Windowed House**.

- The grower can then add a biomass boiler to this system and avail of the RHI payment which is guaranteed inflation linked for 20 years on the basis of heat generated.

- Moy Park are not involved in the RHI payments and the investment in the boiler can be supported directly from these payments and fuel cost savings.

Payback - Individual farms will differ but as an illustration:

- Hot Water Heating £25K @ 100% AHP Annual Income £2.5K
 - Biomass Boiler and controls £30K returning an estimated annual RHI and Fuel Cost Savings of £12K
 - Total Expenditure £55K - Banks in general are supportive of this investment
- it's a significant return!
