Good morning Brian. I trust you had an enjoyable extended weekend.

Thank you so much for your time when we met with my colleagues Elliott Thickett and Peter Beighton on Friday last. It was time well spent, very informative, and a pleasure to see a Moy park farm, and how you go about your business.

Further to our discussions over the course of the day, as agreed, I would like to invite your colleague David Mark and yourself, to our Tianco site on Thursday 24 July. This is to view the products we discussed, namely the Biomass Eco Air Blower System, which we feel would be a suitable product for Moy park's poultry house heating requirements. We may also be able to view the prototype Turkey brooder mentioned, though this is to be confirmed.

I would also like to extend the invitation to your counterpart in England, whom I feel sure would find the visit extremely beneficial. I would suggest that flying into Leeds/Bradford Airport would be the most convenient for you, and I will of course, meet you on arrival.

On another note, as requested, I have had confirmation from Ofgem's Northern Ireland RHI department. The use of our Biomass boilers, in the incrop period to produce hot water for poultry house cleaning, is perfectly acceptable. I have the contact details at Ofgem, should you require them.

If you have any queries concerning any of the above, please do not hesitate to contact me.

I look forward to receiving your travel plans and numbers, at your earliest convenience.

Kind regards.

John P Cahill
