Tom

Just to confirm – we are encouraging the conversion of Turkey Houses to Dual Broiler/Turkey Capability – with windows and suitable feeding and drinking systems.

The AHP allowable for these conversions would be 115% over 5 years – has this been signed off at Central?

If we can get this converted Qtr 3 2014 and Qtr 1 2015 then we can look to source weekly Turkey from third party growers (McKeown/Grove) and maximise our own housing for Broiler Qtr 2 & Qtr 3 2015.

(I think if we push this many of the Turkey guys will be thinking of Biomass so this timing is good – now we know we can Brood Turkeys with a little gas and a lot of hot water – this falls into their lap – and they will want to get this done soonest due to fears on the duration of the government scheme on RHI!)

Additionally if we can get any capacity from McKeown/Grove that can grow Broiler in Qtr 2 & Qtr 3 2015 we should pursue this opportunity – even with the build program we will be tight for space over this period.

David
