[Press Release for On-farm biomass workshop on benefits of Biomass Heating. Brooke Hall Estate.DOCX](#)

David, Please see attached press release for a workshop I am running at Brook Hall in Londonderry. Whilst part will concern growing, harvesting and drying wood chip, the section on costing and RHI and on options for boilers may be of interest to you or your colleagues. If you think any of your farmers would benefit please invite them to register with us.

Also if we could arrange to meet to take forward specific training for Moypark it would be appreciated.

Regards

Cathal
