Will call Tuesday – happy to look at this servicing issue and to notify/advise growers of why this is important and what is required

David

**Subject:** CAFRE/AFBI Biomass event at Hillsborough  
**Importance:** High

David,

I am planning an event in association with AFBI Hillsborough on all issues Biomass including Energy Crops, environmental planting of willow and also to cover sustainability issues in line with Dept. of the Economy introduction of fuel supply lists, over next 12 months and introduction of emissions regs. next year. Issues surrounding servicing of biomass boilers can also be covered. The event is targeted at the farming community but should be relevant to energy crop producers, fuel suppliers including the rash of new pellet suppliers, and anyone with a biomass boiler.

Happy to consider any issues you would like to see covered of particular relevance to the poultry sector.

Also I am aware that there is an issue with some farmers who are not adhering to service intervals on their biomass boilers or actively interfering during servicing. As this has potentially serious ramifications, e.g. potential infringement of RHI conditions, loss of warranty, early boiler failure, I would like to discuss with yourself. Please give me a call at your convenience. Many thanks.

Kind regards

Cathal
