Jim,

The official line is that we do not support biomass so its up to the farmer.  
In reality it would need two boilers, one per house, and one gas boiler per house.  
Give me a shout if you want to go over it?

Regards,  
Stephen

Stephen

what is the current requirement for new houses and biomass.  
I have a quote from fg for one 199kw boiler between two  
houses and 1 back up gas boiler. I have a second quote from  
for two biomass boilers and two gas back up. I just want to  
make sure it's up to spec best regards Jim
