She rang me some issues with heat calculations which have to be re submitted – she will do this as I am away – but not a show stopper just a bit more delay

David

Hi Nicola

David is going on holiday for a few weeks and finishes tomorrow , thought we had better touch base . Is there anything outstanding of any of the OFGEM registrations , we are still awaiting confirmation

Of registration for NUtts Corner & Carn Hatchery Site .

Any update would be appreciated .

Many thanks

fiona

Personal information redacted by the RHI Inquiry

David, Fiona

I am currently waiting for Ofgem to get back to me re technical data sheets and formula's they have requested for the external pipework. John has been dealing directly with this. I will probe them again tomorrow and speak with John (who is out of the office today) but once we have what they need exactly all will be fully submitted.

ACT

I will let you know.

Kind Regards

Nicola Harron

Hi Nicola

Re below , we are just touching base to see what is outstanding , have you been able to send on tech documents?

Is there anything we should be supplying to you if so please advise.

Regards

Fiona

Hi David,

I will deal with these queries. I will need some tech documents of John for the pipework, if you could please send me through further photograph's as they have requested for the above ground pipework?

Thanks

Nicola

RHI Number	[Personal information redacted by the RHI Inquiry]	Account Name	Moy Park LTD
Applicant Name	David Mark	Technology	Solid Biomass Boiler

Dear David Mark

Thank you for your application for accreditation to the Non-Domestic Renewable Heat Incentive (RHI) Scheme. I am currently reviewing your application and require the following information to assess the eligibility of your installation:

HL180-1: The Letter of Authorisation is signed by Helen Glennie, however, the Authorised Signatory for the application is David Mark. Please ensure the Letter of Authorisation is signed by the Authorised Signatory. Please provide a Letter of Authorisation in accordance with our template, which can be found here: <http://www.ofgem.gov.uk/e-serve/RHI/howtoapply/Documents1/Renewable%20heat%20incentive%20Letter%20of%20Authorisation.docx>

HC140 - Please enter the post code of your address with spaces (e.g. BTXX XXX). Also, please ensure that you have specified a precise & full address of your installation - including the building number if applicable.

-Please provide full length photographs of any above ground pipework present in this installation. Please also upload relevant datasheets for the external pipework from which you have obtained the thermal conductivity from. Please provide pipework specifications at question HK120, including: nominal diameter, insulation thickness, lengths and the precise model and manufacturer of the pipes.

HK120 - There seems to be inconsistency between your provided meter readings and the IRMA report. You state that your meter readings on the 26/02/2016 are 3717kW, however, the IRMA states that at 20:00 of 26/02/2016 the meter readings were 418kW. It is impossible for your 199kW boiler to generate another 3299kW (~16 hours of consistent use) in the last 4 hours of the day of 26/02/2016. In section HK120, please provide an explanation for this discrepancy and the large meter reading - please note your operating hours declared in the Heat Loss Calculation are much lower than the meter readings indicate.

We cannot continue with the review process until we have received this outstanding information. **The status of your application is currently set to 'with applicant'**. To add this information to your account, you will need to login to your account, edit/upload the relevant details and re-submit the application. For help, please refer to pages 29-31 of the [Guide to Using the RHI Register](#).

It is likely to be in your interest to submit this information without further delay, given that the date for any RHI payments to start – and the applicable tariff level – cannot be set earlier than the date your application is 'properly made' (assuming that your installation both meets the eligibility criteria and is commissioned prior to this).

A 'properly made' application should include all information we ask for in the application form to a suitable standard, to enable us to make a decision on the eligibility of your installation.

*If you have not done so already, please also provide a completed **Bank and ID Form**. Guidance explaining the information required and the address it should be **posted** to is included on the form.*

If you have any questions, please do not hesitate to contact me.

Kind regards,

Ernestas
