

~~REAP~~ Meeting with P. Hutchison on RHI 2  
study 11/4/13

RHI developments - Sustainability criteria, emissions,  
Study by consultants timescale.  
Renew of REAP

Impact → assume there will be  
80

⇒ Impact on tariff

⇒ large biomass consultation  
- security of supply

⇒ Billiland, Balcar

- assumption  
constraints in terms of supply

Phase 2

- Domestic RHI would look like

→ complete by end of two months →  
to go to

7 yr tariff

similar to GB consultation,

up front support? required e.g. install  
savings.

- similar standards - MCS certified.

Biomass CHP  
 - 2 ROC's  
 1/2 ROC disappears 2015

1 1/2 ROC's + 4.1p

Over 1MW  $\Rightarrow$  CHP makes sense.

Biomass CHP - closely follow under NIRE  
 $\rightarrow$  rent charge too much.

Sustainability criteria will apply

Biomass 1MW

PM & NOx  
 - DECC have

EU Standard

We can set own levels  
 & within EU levels

DCE

amount of installations

25,000 ~~units~~

15,000 Commercial  $\rightarrow$  wouldn't be huge  
 for heat targets  
 Heat pumps.

PH  $\rightarrow$  to confirm with DECC plans for legislation

- results from industry consultations ?  
 $\rightarrow$

- be mindful of what DECC has done  
 - need certain level of union

$\rightarrow$  nothing on air quality at this stage

make sure strong case

$\rightarrow$  DE's view

$\rightarrow$  EU standards  $\rightarrow$

Air Quality  $\rightarrow$

- front bludge

- drafting consultation

$\rightarrow$  technology standards

fuel issue

$\rightarrow$  assumptions  $\rightarrow$  union will be used

$\rightarrow$

$\rightarrow$  due draft final next Friday

(AP) Ben Scallie - Forest

20,000 dry tonnes per annum

$\rightarrow$  8,000 hectares

340 giga

Peter agreed to meet DECC.

- clarify DECC  
→ impacts  
→ evidence base.

DOE →

End → May
