Kenny that's great and I will look forward to seeing you again then if not before. Naturally we will be in touch several times before then and I have copied my colleague, Anne, who is pulling this together.

Talk soon

Regards
Chris

Hi Chris,

Keeping busy, which is the main thing! Hope all is well with yourself.

Absolutely, I'd certainly be interested in taking part. September 8th allows plenty of notice, so I shouldn't have any problem arranging that. I'll probably be in touch closer to the date, for the finer details, but I can have a few things put together between now and then.

Thanks for the invite.

All the best,
Kenny

Hi Kenny

I haven't seen you in a while, how are you keeping?

I hope you don't mind me contacting you however I was wondering if you might be able to give something some consideration. I am organising a wood chip quality workshop at AFBI Hillsborough and am looking (amongst short presentations from WFOA, CAFRE, DETI, AFBI) for someone to speak briefly from a chip suppliers point of view. Naturally I would like a non NI supplier for this to avoid the obvious and we were thinking of yourself?

Essentially - "Wood chip supply chain with adherence and focus on quality". Someone who supplies wood chip and WFOA registered so the aspects of quality can be brought to the fore. This talk would be followed by CAFRE from a point of view of a wood chip supply contractor so it fits well.

What do you think, we are looking at 8th September?

Hopefully talk soon

Regards
Chris

Hi Chris,

Hope you all got over the influx of visitors to the Hillsborough site last month for the Biomass open day.

I'm just dropping you a bell to see if you had come across a Belfast based company, Amber Green Energy, or their CEO Dwyer O'Neill. I met up with him with the view to possibly being taken on as they try develop the biomass side of their company, as the currently seem to be. He indicated that they were taking on a number of AD projects, but for now his focus is

the installation of small pellet boilers. They seem to be a relatively new company, and gaining ground on the back of the RHI and ROC's.

However, I'm not sure they share the same ethos as I do or one which I have been previously used to.

I'm keen to understand more about them before I'd proceed any further, if you knew anything about them I would be very grateful if you could give me some insight.

All the best,
Kenny McCauley.
