Chris

Many thanks, this is very helpful. I assume you don't see the need for essential attendance by DETI? I saw our role as facilitating the meeting but letting you get on with it. I that OK?

Michael

Michael – please see some comments below.
Are we saying about 2.30pm?

1. Could you provide details of who Shan will be meeting and short pen pics if possible? Including DETI official?

[I have attached an outline of myself. My colleague James will sent something along for him](#)

2. Could you clarify where they will be meeting? Front Entrance? Can the car go right to the front door?

[Absolutely – drive up through security and park in the main courtyard](#)

3. Is there car parking available for myself and Clare coming in a separate car – do you need car registration details?

[I will inform security so come straight up into the courtyard](#)

4. Some general background on AFBI and their links to DETI would also be helpful.

[From a renewable heat energy point of view, AFBI would have links with DETI via the RHI personnel. This manifests in engagements at knowledge transfer events, Bioenergy association meeting \(IrBEA & BENI\) and later this year at a workshop on wood chip quality. From an electricity point of view I don't think we have many links with DETI. Er sell ROCs and have links with other agricultural AD systems.](#)

Regards
Chris
