

# Tariffs

- The RHI aims to compensate investors for the additional costs of renewable heat compared to traditional fossil fuel systems.
- Tariffs take into account all the various types of costs involved (including capital, financing, barrier, fuel and operating) to produce a pence per kWh cost figure.
- A rate of return is included in order to stimulate interest in a developing unknown marketplace and to provide compensation for financing costs.
- Payments will be made on a quarterly basis
- Once an installation is accredited under the scheme they will receive a fixed level of support which will be adjusted annually in line with inflation.
