Robert

Dan has passed your email to me to respond around the proposed non domestic RHI changes.

DETI is currently looking at potential changes to the non domestic RHI in the autumn, (early October), as part of the outworking of the phase 2 review consultation from late 2013. The proposals under consideration concern a new tariff for combined heat and power,(CHP), to coincide with the changes to the ROC's and also cost control measures around biomass banding, and possible tariff tiers for biomass. Details will be published over the coming weeks.

I hope this is helpful to you.

Regards

Seamus

Dan

With our Stroma software we can get a couple of documents prior to lodging the EPCs which relate to the Green Deal. These documents are unavailable post lodgement which I assume is due to differences between mainland/ N Ireland.

Has there been any announcement yet on when we might know what changes are coming for commercial RHI in October?

Kind regards

Robert

Robert,

I hope you are well.

One question which you may have already answered for me - so sorry if you have.

Are SAP worksheets available for RDSAP assessments as well as SAP New Builds?

Thanks

Dan
