Seamus

Some questions:

- Biogas tariff: my understanding is that the tariff for biogas combustion up to 199k kWh is 3.3p/kWh with no support above this level. Correct?

Yes, the current biogas combustion up to 199kW is 3.3 pence per kWh

- Biofuel: is there support for biofuel up to and above 1MWth, e.g. CHP?

Support for biofuel will be introduced for CHP with the new tariff being introduced from 4 November 2015, 3.5 pence per kWh for new installations and 1.7 pence per kWh for systems converting from fossil fuels.

- Biomass Boilers: is the tariff still 1.5p/kWh from 200kWth to 999kWth?

Yes,

- Separate circuits: my understanding is that applications can no longer be made for separate circuits for biomass boilers or CHP/ Correct?

This issue is being addressed in the amendment regulations currently being progressed. From 4 November all eligible heat in a given building will be regarded as a single system regardless of whether a plant is hydraulically linked to others or stand alone.

Thanks.

Regards

Jim
