Good afternoon Brian

Thank you for your email enquiry. Unfortunately it isn't possible to add additional capacity to an existing accredited installation now that the scheme has closed.

Regards

Seamus

Subject: N Ireland RHI

Following the closure of the rhi to all new participants in N Ireland, is it permissible to add to the current RHI approved scheme's? If a site had a current RHI accreditation number could it add an extension to its current RHI plant increasing its output to the permissible 198kw if it was already registered at 99kw going forward since the closure of all new participants?

Please advise in due course.
