Rachel,

As discussed, please see below my email to Shane expressing my contentment with the RHI project.

Subject: Domestic RHI Case

Shane,

I've met with Alan and despite only being able to undertake a cursory review of the economic appraisal I'm reasonably content that the NIGEAE guidance has been applied appropriately and that all the key issues have been considered and noted within the document.

As discussed with Alan, the principles applied appear to be in line with the previous RHI scheme (which I did have some involvement with) and the preferred option has been chosen on the basis of optimising heat output, total cost and available funding. Furthermore there is a clear policy expectation that NI (and other devolved administrations) make a contribution towards the UK's overall legally binding renewable energy target.

It is on this basis, that I'd be content for the EA to be submitted to DFP.

Regards

Sam

Alan,

I hear from Finance today that this case needs to go to DFP for approval and, as I understand it anyway, that this raises two issues following the casework:

- 1) The case is complex and Finance want to ensure that a DETI economist is fully up to speed on all the detail within the case, so that DETI can respond with authority, and quickly to any, DFP queries. I suspect that, with time being tight, it is really only feasible for you to be that person and ensure that you know the issues etc inside out.
- 2) In addition there needs to be an ASU overlay (the fully "independent" ASU assessment). That will have to be short and quick, but any assessment will be unable to get into the detail, and it will only ever conclude on VFM while taking the various figures etc at face value. Sam can do this, but will only have a short time to devote to this.

Finance are targeting a submission to DFP on Monday. That means we need to be in good a position on No1 and No2 very quickly and you will need to get a copy of the case etc to Sam ASAP.

Sorry I wasn't around much today to speak personally about this.

Also copying to John as I don't know who in Energy Division led on this case as I wasn't involved in this particular casework.

Regards

Shane
