Many thanks Trevor - as we are being pressed on this need at the moment I will address it - we can deal with any change as it arises.

Thanks again

Carol

Carol

There is some uncertainty at the moment around the longer term future of the RHI - there may well be more clarity by the end of the month around forward funding availability for both domestic and non-domestic RHI following announcement of SR outcome.

I fully accept the need as presented however this need may be subject to change - so conditional approval subject to clarity on scheme going forward and resource impacts following SR outcome in two weeks (if scheme were to have to close it may be that additional resource needed in short-term - even above this request - but medium term no additional requirement as if the scheme were to in extremis close there wouldn't be any new applications to process etc post closure).

Trevor

Resourcing Group - please see below and attached from Wendy Johnston.

Thank you

Carol

Please find attached BIT approval for a new AO post for Energy Division.

Mentioned in the correspondence is a SO post which Resourcing Group previously approved although this has not been filled to date due to the absence of funding - the BIT approval letter for this post is also attached for information.

The new AO post and the approved SO post will be funded from savings from a part time DP and part time EO1 who have secured voluntary exit. Energy Division is content that the shortfall of £26k per annum in funding can be met within the Division. Chris Stewart has endorsed this.

For your consideration please and to advise if you are content DHR acts to secure staff as a matter of priority. A response by 9 November would be appreciated.

Thank you

Carol

Thanks - subject to my superiors position I would want it made clear that this is conditional and the longer-term affirmation of the post is subject to further approval - so that it does not become absorbed in an amalgam of the division's overall resource position particularly as other areas are reducing which in part enable such increases to take place.
