Davina

Many thanks.

As discussed, if OK with Ofgem, I will go round to Ofgem on Wednesday 18th after my meeting with BIS. If all goes to plan, I could probably be at Ofgem about 4pm.

Unfortunately a meeting first thing on Thursday 19th in Ofgem would be difficult as I need to be in BIS at 10am for a presentation by DG Comp.

If there is a problem meeting on Wednesday, I could try to see if BIS would provide a meeting room at 9.00am in BIS, but clearly we wouldn't have a lot of time to discuss.

In relation to the NIRHI applications data below, lots to think about!

Initially I was surprised at the high estimated amount of de minimis aid. As discussed, to date I have always been given DETI the impression that the amount of RHINI de minimis aid would be well below the de minimis ceiling. Therefore, I think we really need to understand why the estimated amount is so high. However, it is possible the amounts are correct – see below.

As Geoff Smyth suggested, the number of boilers with a capacity of 99kW looks odd and needs further investigation, especially as the RHI tariff drops from 5.9p/kWh to 1.5p/kWh once the boiler is 100kW.
