At a quick read, and for what its worth,.....

They were going for an 18 month approval on Non D to keeps things simple, but they are also asking for a big uplift in the Domestic approved spend with not an awful of lot information to justify. The domestic element to the document / approval looks very light in comparison to the uplift in Dom spend – maybe it should be done separately as it seems to complicate an already difficult non D case??

Very much gives the impression of a big change to the Dom approved totals is being tagged onto an 18 month Non Dom case.

Shane

This is rhi case as it stood a couple of days ago – i think there are major gaps but would welcome your view.

Please see attached draft Business Case for the RHI. I haven't attached the any annexes apart from the forecast of expenditure for new commitments entered into from Apr 15 to Sep 16 (Annex I). Section 7 (Scheme Administration) needs to be completed as we're awaiting cost estimates from Ofgem.

Thanks, Stuart

Shane

That was my view also that there was very little on domestic – but i think they probably need to uplift domestic on basis of demand (or maybe also review tariffs).

Wasnt sure about adding new technologies to non-domestic either – as this also increases demand and would have thought that it would be better to bring forward in 18 months.

Eugene was going to arrange a round-table – do you agree?
