Subject: Outstanding Data

Dear Stephen,

Thanks again for the information already submitted – what we're also looking for is justification for the changes made to the biomass tariff in 2015.

So there are two aspects to that – the rebanding, the 1314 hours and the revised tariffs themselves.

What we need is the analysis that justifies where the approach and specifically the numbers of that came from.

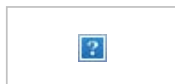

Hope that makes sense – do pick up the phone if not,

Kind regards,

Kate
