More or less on the legislation, still fighting with your officials on the funding; they will end up forcing closure of the scheme (and it's not even DEL) at this rate.

Committee panicking about its stance on NIRO closure over the summer. It's starting to get some nasty letters from small scale developers. You need to put Mr Frew back on to stiffen the Committee's resolve.

Yes at last! Very good

Are deti on track for changing the RHI in early November?

Not impressed with Patsy in Chamber the other week. Not fair on your team

Regards

Andrew

Andrew,

Just a heads up if you weren't aware that announcements of arrangements to extend the gas network to East Down will be probably be made later today. Bit of good news.
