Further to our meeting just now, I have just taken a call from Malcolm after a meeting he had with FM and Acting FM.

I need to send to Malcolm by 13.00 tomorrow a list of the items we might propose to put forward for Ministerial decision on the basis we discussed. I said we would be keeping this to a minimum, but it was agreed that we would produce both:

- a. A list of top priority business requiring approval – my list currently comprises the following but open to anything else essential: policy on NIRO closure re onshore wind; debate on SR re NIRO closure for other technologies; Bytel MOR; progression of RHI restrictions; and
- b. Highly desirable business (eg Final Stage of Insolvency Bill ? Second Stage of Credit Unions Bill).

Can David pull this together for me, but please think hard and take any further advice you need as a matter of urgency.

Many thanks.
