

We didn't have these in June. There was another Bernie email they were given then which was the one C&AG quoted as well as the HMT chain.

Many thanks.

Yes this is it - this was very early on in the option Appraisal process - we were still considering grant as an option in those days. - and I was checking what exactly the money could be used for.

Are these the April and may emails that NIAO were referring to in their report - or was it only the 5 percent penalty one they had.

A.

Andrew

Emails attached as discussed. Second email highlights that because of risk of overspend, DECC were already thinking of degression (just 3 months after scheme started).
