Peter

As discussed on Friday morning. Sorry for the delay - I picked up a nasty bug over the weekend and am only just back in the office.

Here's several spreadsheets, one for each tariff. I've also included a spreadsheet listing all the tariffs and reference installations.

All this needs to be treated as a draft that CEPA takes no responsibility for, since it's outside the ToR. Please only use these spreadsheets if you are happy to accept them on that basis. They should be for your use only, really.

One thing to note is that barrier/ hassle costs aren't shown separately. Upfront barrier costs are shown in the capex/ capital cost lines and ongoing costs are shown in the opex/ operating cost lines.

I hope these are useful. Do give me a call if you want to discuss.

Regards

Iain
