Importance: High

Good morning Cathal

You kindly provided the attached analysis paper for us some months ago in relation to the heating requirements in relation to the broiler sector in poultry which was most helpful to us around the cost control measures we introduced in November past. As you are aware since RHI suspension the scheme has come under considerable scrutiny both internally within the Department and with the NIAO. We are currently working with the NIAO on comparisons between running biomass and oil.

In this regard Stuart has asked me to approach you to see if CAFRE would be able to provide an updated paper comparing the costs of running a 99kW boiler with biomass versus oil if this is something you have looked at?

Grateful for any help you could offer.

Many thanks

Regards

Seamus

Seamus

Can we check with CAFRE if they can provide an updated paper comparing the costs of running a 99KW boiler with biomass v oil. We have to validate the NIAO comparisons.

Stuart
