Direct of Energy Division

Internal Audit Review of: Non Domestic RHI Scheme within Energy Division

Further to my paper of 10th February 2016 and our subsequent meeting on 12th February 2016. Please find attached a revised Terms of Reference which sets out the proposed scope and objectives of the Internal Audit review of the RHI Non-Domestic scheme. As agreed at our meeting yesterday with Ofgem, a separate review will be undertaken in to the allegations received. This independent review by Deloitte of Ofgem processes and Northern Ireland arrangements including on site audits in light of allegations of fraud/misuse that have been received.

I would be grateful if you confirm that you are content with the revised Terms of Reference for the Internal Audit review. Please do not hesitate to contact me should you wish to discuss the proposed review.

1. Introduction

- 1.1 In accordance with the established Internal Audit strategy and 2015/16 Internal Audit plan agreed by the DETI Accounting Officer and the Departmental Audit Committee, Internal Audit will carry out a review of the non-Domestic Renewable Heat Incentive scheme administered by Energy Division.

2. Purpose and Scope

- 2.1 The purpose of the review will be to provide an independent professional opinion on the adequacy and effectiveness of risk management, control and governance.
- 2.2 The scope of the audit will include control, governance and risk management arrangements associated with the following areas:
- Scheme Design
 - Financial Management – Payments and Budgetary Control
 - Governance and Oversight Arrangements
- 2.3 The review will focus particularly on the effectiveness of internal controls exercised from the initiation of the scheme and the action taken to address concerns which arose over regularity, affordability and value for money with the scheme. The review will also assess the potential for fraudulent activity in regard to applications to the scheme.

3. Objectives

- 3.1 The following objectives will be used as a basis for our evaluations and opinion about the adequacy and effectiveness of risk management, control and governance To ensure that:-

- The non-domestic RHI scheme has been designed so that awards are only made for valid applications that demonstrate they have met all of the scheme criteria, including that the purpose is for a valid business activity. In addition that the proposed heat output of the application is only at a level that is necessary for the proposed business described, and by design the scheme incentive is not such that the award generates payments that would exceed the costs of the heat being generated Finally, that there is a valid legally binding agreement between DETI and the applicant.
- An adequate and effective budgetary control system has been established to enable complete, accurate and reliable financial management information to be extracted for monitoring and reporting purposes. In addition, to ensure that the long term budgetary commitments for the scheme are monitored and that formal budgetary cover for the life of the scheme is in place to make sure that all commitments can be met.
- Adequate and effective governance and oversight arrangements have been established over the relationship between DETI and OFGEM and robust assurances are provided over budgetary transfer payments made to OFGEM and the administration of Departmental funds, including the award and payment processes.
- In light of recent experience with the operation of the scheme, a key objective is to provide a full assessment of:
 - the factors which contributed to the large spike in scheme demand and costs;
 - the effectiveness of existing internal controls;
 - the management of the risks; and
 - on the lessons to be learnt.

4. Conduct of Audit

- 4.1 The audit work will be performed in accordance with the Public Sector Internal Audit Standards (PSIAS) and the professional standards and guidelines of the Chartered Institute of Internal Auditors.

4.2 Members of Internal Audit staff, in accordance with the Internal Audit Charter, have access to all records, assets, personnel, premises and such information and explanations as considered necessary to fulfil audit responsibilities.

5. Audit Resources

5.1 The audit will be performed by members of the internal audit team Dovile Bagdonaite and Mark Cardwell (Audit Manager).

6. Reporting

6.1 The audit team will provide management with regular informal updates as the audit progresses or as requested. Upon completion of the audit the overall findings will be discussed at a post audit meeting with Mr. Stuart Wightman (Head of Energy Efficiency Branch).

6.2 Upon completion of the audit a draft report will be issued to Mr. Wightman, Mr. John Mills (Director of Energy Division). Upon receipt of management's formal response to the draft report, a final report (incorporating the management response) will then be issued to Mr. Wightman, Mr. Mills, Mr Andrew McCormick (Accounting Officer) Mr. Chris Stewart (Deputy Secretary), and the NIAO in accordance with established arrangements.

6.3 In accordance with Internal Audit Key Performance Indicators, a draft report will be issued within 15 days of completion of fieldwork. The final report will issue within 10 days of receipt of management responses. Management is requested to submit management responses within 15 working days of receiving the draft report.

* back up information for the payments made does not include individual customer personal details or b/acc numbers. It does not demonstrate that ind. payments were made from Ofgem acc. It only shows the bulk/total payments made on the date

Ofgem information for top up runs improved from this fy

I can see how the DETI staff are scrutinising all payment info. The question is however whether this is sufficient.
Is there a time frame for the clients up to when they can no longer claim (e.g claims were submitted in March 15 for heat in Aug 14)
Is there ever a sample check done to see if the meter reading provided and the award given is accurate

Ofgem administration costs

information on NIRHI non domestic scheme held by DETI

Installations and generators

757 live installations on the register

721 installations have payments registered against them

482 generators registered (incl. 141 - no names known by DETI)

145 generators own multiple installations

Boilers

745 - solid biomass boilers

5 - medium commercial

5 - ground source

of them :-

571 - 99kw

13 - from 100kw to 990kw

Payments

2013 - total £128,471; average per case p/a £4,144

2014 - total £2,168,408; average per instalation p/a £9,856 (220 installations)

2015 - total £12,220,933; average per case p/a £16,997 (757 installations)

22 out of 50 instalations (first from the top) tested exceed the level of expected monthly payment stated on DETI database

Highest amount paid p/a per installation

2013 - £12,646

2014 - £41,298

2015 - £181,276 (Eglington Timber products Ltd)

Generators with most installations registered

10 - Maxwell Farms (£486,910 in total over 2 years)

10 - Mountain View Farm (£219,377 in total over 2 years)

10 - Paul Hobson Ltd (£322,030 in total over 2 years)

9 - Gareth Nelson (£273,649 in total over 2 years)

6 - Ballingdaragh Poultry Farm (£207,331 in total in 1 year)

6 - Christler Jeep Boucher (£109,610 in total in 2 years)

6 - E & J Black (£105,369 in total in 1 year)

6 - Jeremy Hobson Ltd (£298,113 in total over 2 years)

6 - JF, MD & AF Doran (£143,656 in total over 2 years)

6 - Knockanloan (£348,787 in total over 2 years)

6 - National Trust (£51,346 in total over 2 years)

Tiering of tariffs in the GB Scheme

DECC released a public paper for Non Domestic Renewable Heat Incentive Scheme Degression Mechanism in November 2014 (to introduce changes to the degression mechanism) which tells how degression works.

It reminds that degression as means of controlling budget for the no-domestic scheme has been introduced since April 2013 and is expected to be in application until March 2016. The paper also explains how the tariffs are reduced when estimated expenditure thresholds or triggers are reached. Risk based approach is also applied i.e. expenditure is evaluated for the scheme as a whole and for one or more technologies.

The paper also provides details of how the GB scheme treats the applications in between the period of announcing the change (every quarter, giving 1 months notice). Monthly updates on scheme performance and progress toward expenditure thresholds are published on DECC website and is available to public.

Analysis of DECC and NIRHI tariff changes for biomass boilers (99% of NIRHI installations are biomass boilers)

GB scheme

Boiler size		until Jan 13	after Jan 13	after Jul 13	May - Jul 14	Jul - Oct 14	Oct - Jan 15	Jan - Feb 15	Feb - Apr 15	Apr - Jul 15	Jul - Oct 15	Oct - Jan 16	after Jan 16
small (up to 200 kW)	Tier 1	8.94	8.94	8.94	8.94	8.53	7.72	6.91	6.91	5.87	4.4	4.18	3.76
	Tier 2	2.34	2.34	2.34	2.34	2.24	2.03	1.83	1.83	1.56	1.17	1.11	1
medim (up to 1 MW)	Tier 1	5.49	5.49	5.18	5.18	5.18	5.18	5.18	5.18	5.18	5.18	5.18	5.18

large (from 1 MW)	Tier 1	1.02	2.03	2.24	2.03	2.03	2.03	2.03	2.03	2.03	2.03	2.03	2.03
	Tier 2	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a

cf. Northern Ireland scheme 98% of biomass boilers would fall into the category for small in the GB scheme

NI scheme

Boiler size	before 18 Nov 15	after Nov 15
less than 20 kW	6.7	Tier 1 6.7
		Tier 2 1.5
up to 100kW	6.4	Tier 1 6.4
		Tier 2 1.5
up to 1 MW	1.5	Tier 1 1.5
		Tier 2 n/a

In addition NIRHI introduced the annual cap of max 400,000 kW per annum

Technology and payment analysis

Tariffs recommended by CEPA report in 2012

	tariff in pence*	number of live installations	average total payment in 2015
Biomass domestic less than 20kW	6.2	2	£3,466.00
Biomass small from 20 to 100 kW	5.9	737**	£17,000.00
Biomass medium from 100 to 1000 kW	1.5	13	£23,178.00
GSHP domestic less than 20 kW	8.4	3	£2,130.00
GSHP small from 20 to 100 kW	4.3	2	£4,345.00
GSHP large more than 100 kW	1.3	0	0.00
Solar Thermal All	8.5	2	£131.00

* tariffs are subject to the annual RPI uplift

** of which less than 45kW 63
(This is the banding proposed by Ofgem cf. installations less than 45 kW MCS provides assurance)

IAS Research test

IAS contacted one of the companies in Northern Ireland selling and installing biomass boilers (the company name is known to IAS) and pretending to be genuine business requested information on installing biomass boiler in a warehouse. The company advised that it would cost in the region of £30,000 to buy a medium size boiler plus installation costs and receive 6.4 p for each kWh generation for 20 years. At the same time the wood pellet fuel cost is roughly 3.6 p per generation of each kWh of heat.

So under the condition of the scheme prior to 18th November 2015 by installing 99 kWh boiler which is 90% efficient and which is run on 24/7 operation a business may expect to generate approx 2000 each day or 700000 kwh every year. This in turn would result in RHI of £44,800 paid on an annual basis and almost £900,000 throughout the 20 year life of the incentive. Assuming the capital cost of £60,000 and the fuel consumption to generate the same amount of heat the expenditure would be less than £600,000 throughout the life of the scheme thus resulting in over £300,000 in profit from generating heat.

We understand that this information gathered from suppliers should be allowed for certain element of optimism bias, however these figures sufficiently demonstrate how the NIRHI payments, before introduction of the cap and tariff tiering, was a very tempting option for businesses to add to profit.

	<i>Actions promised by management that will be completed at the Casework Committee - 9 March 2012</i>	<i>Current position</i>
1	To develop an RHI road map with other NI departments. This will be facilitated by the Renewable Heat Strategy group	IAS has no evidence of this having been done to date.
2	RHI non domestic tariffs will be calculated as the net costs (difference between capital and operating costs of fossil fuel counterfactual and renewable alternative) plus up to 12% rate of return.	This is the initial take on how the tariffs have to be calculated. The subsequent Business Case (July 15) provides different workings out of the rationale behind the tariffs (based on CO2 and jobs consequential)
3	The scheme will be reviewed in 2014 and proposed changes will be implemented in 2015	The review not been carried out to date.
4	Phase 2 of the scheme will begin in 2013 and involve introduction of the domestic sector and consideration will be given to include additional technologies to non domestic scheme.	Domestic RHI introduced from December 2014, inclusion of new technologies has not happened.
5	NIRHI scheme will have in build scheduled reviews to allow DETI to ensure that the scheme remains fit for purpose and value for money.	IAS has no evidence of this having been done to date.
6	It may be that the tariff levels are not sufficient to encourage uptake or that they are too generous (very unlikely) and hence uptake is such that there is insufficient budget. This will be mitigated by regular management reports provided by Ofgem which will enable to monitor uptake and forecast expenditure. The RHI will be reviewed in 2014 and tariff levels may be adjusted for new installations if appropriate.	Ofgem provide weekly report on the NIRHI applications etc. The review in 2014 did not materialise.
7	Budget monitoring committee will be established and department will receive monthly reports from Ofgem on the application, accreditations and budget spend.	IAS has no evidence of this having been done to date.
8	If necessary the scheme could be closed to new applicants mid year if applications were higher than expected and budgets risked being overspent.	This is a misstatement. The right to suspend the scheme was not built in the legislation.

9	Energy Division will seek casework committee approval in advance of Phase 2.	Casework Committee was consulted before introduction of the domestic RHI scheme.
10	State Aid. Reapplication for State Aid approval will be necessary if tariffs are amended or revised.	The EC has not been not renotified yet (tariffs and other key elements of the scheme changed)
	Actions requested to be completed by the Casework Committee - 9 March 2012	Current position
1	Energy division to obtain the respective approvals from DAO and Minister for the appointment of Ofgem through a DAC (if confirmed appropriate by CPD) and 3rd party organisation delivery award	Completed.
2	Energy Division to confirm to Casework Committee that any contract with Ofgem for administration of the RHI scheme would have performance targets, remedies, safeguards in place for under performance and breakpoints	Ofgem Feasibility Study 1 November 2012 (and amendment of 21 December 2012) provide some reference to performance targets however these were not included into Administrative arrangements document.
3	Energy Division to engage with IAS regarding Ofgem management arrangements and in particular on the requirement for EDO audit inspections to be carried out on Ofgem as administrators of the scheme.	Energy engaged IAS in this and specific auditing arrangements were included into Administrative Arrangements Annex.
4	Energy Division to send a paper to the Top Management Team seeking approval for the ongoing administration costs for Ofgem to operate and maintain the NI RHI system.	Completed (21 December 2012)
5	Energy Division to seek casework committee approval in advance of Phase 2 of the RHI scheme.	Casework was consulted and approval sought before Domestic RHI was introduced.
6	The Business Case to DFP (and the Minister) should explicitly address the reasons why the RHI is favoured over the Challenge Fund option	IAS have only seen the most up to date copy of the Business Case which was sent to DFP
7	Energy Division to send submissions concurrently to DFP and Minister seeking approval for the scheme.	Completed.
		F Hepper wrote to Trevor Cooper on 29 March 2012 answering to the issues raised in relation to the contract with Ofgem. DT1/16/0019177
