---

Peter,

Attached is a revised version of the report. We have re-structured the conclusions slightly and incorporated an updated version of your recommendations table. I have tried to set the recommendations at the correct level. However there is still the strategic aspect which is difficult to capture in a simple recommendation (and which I don't think you want included in a recommendation). This includes the examination of heat, electricity, gas network expansion, CO2 emissions, etc altogether, and it is only after this that the individual recommendations can be prioritised and set.

Can you review the amendments, in particular the responsible parties (highlighted yellow where I am unsure) to check you are happy with this.

I am conscious that we need to issue a version for review but the oversight group as soon as possible, and we can therefore potentially (if you are happy with this approach) continue to refine the exec summary and conclusions whilst the oversight group are reviewing, for inclusion into the final version.

If you are happy with the attached, I can PDF and send out a version for distribution.

Best wishes,

Andrew

Andrew,

Sorry for the delay in getting back to you on the report's recommendations, this has taken longer than expected because of the nature of the recommendations as they stand.
