Dear Peter,

Please find attached the final version of the Renewable Heat report following updating with the comments and an executive summary. I am sorry it is a couple of days later than planned but the comments took some time to review and make changes, and we wanted to ensure that we had examined them all fully.

We have addressed all the comments in the separate comments document, and where required made changes to the report. As you mentioned, many of these are more comments to DETI on what needs to be done after the study, or to reinforce views. However we have reviewed all of them and commented as appropriate.

The exec summary is relatively short and gives an overview to the facts and figures, leading into the key conclusions and recommendations. We still need to provide you with the GIS diagrams which I will ask our GIS team to collate. Due to size of files, these will need to be provided on CD which we will put together next week if possible.

This has been an enjoyable (and challenging!) study to work on and I think we have all found it extremely interesting. We are obviously still happy to answer questions and discuss the report with you, and look at where some of the recommendations can be taken forwards. Andy and I am happy to discuss these with you at any time.

Best wishes,

Andrew
