David - yes - I should have added that clarification on funding request

Emer

An encouraging response. On reading again a couple of points:

One small point: it should be BEIS in para 6;

One possible larger point: in the final para the letter states that DfE will have to bear the cost of anything above the 17/18 AME profile. I think Andrew will argue that we agreed in our phone discussions that they should be able to bid for additional funding up to the level of projected cost as forecast in the business case, but not anything above this (Mike, is that your recollection?).

David
