Inquiry

Arlene,

I am sure you are been well advised regarding the RHI issue. The funding we get from the Uk is 3% of the UK uptake, I would see that the UK uptake of the scheme will spike within the coming months because the scheme is changing over there as well, Hagans are currently installing a total of 15 MW of biomass boilers there at the min and quite a few more in the balance, they will probably install 25 MW before the March deadline, we installed about 12 MW worth of boilers during the NI's scheme. I see this as critical because the more uptake in the UK the overall uptake will increase then the NI chunk of money will increase surely ?

I am sure your people will already have accounted for this but thought I would send it across to you.

We are all 100% behind you, please don't stand down or even step aside, Northern Ireland needs you.

Kind regards

Stephen Harron

ps well spoken at the Nolan interview.

Kind regards
