Hi Ollie

As per register comment, assigned to you:

Biomass as primary fuel source has not been confirmed;
some Ranheat boilers are on the boiler whitelist as potentially acceptable, but
am assigning to Ollie to confirm this and to update with evidence as
appropriate. Once confirmed, please reassign to Edmund to review HLC and
metering arrangements and to complete L3 review.

[This one had an early site inspection, but is very unhelpfully silent on biomass as primary fuel source...]

Probably fine versus the other Ranheat we had and discussed, but didn't want to risk it...

Ta

Edmund
