Morag

This was not taken forward last week as I am sure you have picked up from emails that DETI have been sensitive over data ownership more generally at the moment. So I propose that once Matthew has spoken to Fiona Hepper about releasing personal info to them we should arrange our meeting....certainly this should happen this week.

Hi Keith,

Where are we at with this? I have seen other emails re reporting but I don't think they cover **data** reporting?

Regards

Morag

Thanks Morag, that sounds sensible. Let me speak to DETI and arrange a teleconference so that we can discuss and finalise this with them.

Keith,

Re the public report data we could send that weekly as that should be very straightforward.

Re any other reporting DETI might want it would not be that helpful to give them the same as DECC. The reason is that what we give DECC is something of a hotch potch of what we originally had set up in our (internal) system reports with some other data added by hand. I would much rather we talked to DETI and ask them what they want / need.

Thanks

**Subject:** RE: NI Public Report

The Admin Arrangements do not go into great detail on the specifics of reporting. Can I suggest that we offer to DETI reporting in the same format and timescale as for GBRHI. Does this make things easier from an ops perspective? If that is the case if you could offer up a synopsis of how this will work I am happy to put this to DETI to seek confirmation that they are content.

Rgds

Hi Sophie,

I have not given this any consideration at all and I don't think Deckerson has done either. I have copied in Keith for his view, and to find out what might be in the admin arrangements, and to request that the scoping of NI reporting is looked at by his team.

Re the location of the GB Public Report we were planning to move that to make it a lot more visible / upfront on our website, this is

something Stella Hockey is working on. Please can you let us know if that will cause any IT problems?

Thanks

**Subject:** NI Public Report

Hi – have you agreed with DETI, or had any thoughts on, how often you'll send over their public report data? As agreed when doing the requirements for this, the GB Public report is staying as is i.e. accessible to anyone via the link on the home page of the Register for E/S/W data; the NI report will contain same data but for NI installations only, and will be accessible via the excel data pulls like the other internal reports, so will need to be sent to DETI via encrypted email for them to publish on their own website.

Any queries please let me know – many thanks
