Hi Peter

I can confirm that we **do not** have an NI account in this name.

Thanks for this – can I check if any of the outstanding applicants are Strabane District Council? Sorry for questions, we have an Assembly Question to answer.

Thanks,

Peter

Hi Peter

We now have the following:

5 Accredited and 6 outstanding at various levels of the accreditation process.

Kind Regards

Michelle

Thanks for this Michelle – meant to ask when you were on phone what the current numbers for accreditations and applications were – is it still 5 accredited and 4 outstanding applications?

Thanks,

Peter

Subject: Goodbye and info on the Concrete curing process

Hi Joanne and Peter.

Lovely to speak to you both today and thank you for your best wishes. As discussed, Senior Manager Teri Clifton will be your interim contact for NIRHI ops. until a replacement for me has been found. Her direct dial is 0141 341 3991.

The Concrete curing process:

I don't think this process would be considered as being performed inside a building so the process would be ineligible.

The RHI definition of a building is that it be:

1. Permanent or long lasting
2. Wholly enclosed

On the information given there is no structure here of which to speak to assess against these criteria. The polytunnels which are eligible are so because the main structure (supporting poles, etc.) are capable of lasting 20 years. The replaceable parts (plastic covering, etc.) must be capable of lasting 2 years. We would also expect these structures to remain in place for a good period of time.

Does the material covering the concrete have a main supporting structure? What is the lifespan of the waterproof membrane? How often does the waterproof membrane get lifted from the concrete? How long does it stay in place overall?

These are all questions that may need addressing in order to give the enquirer a firmer answer. Requesting diagrams may also be useful.

However, I have my doubts that the waterproof membrane would ever be considered an RHI eligible building.

Kind Regards
Received from OFGEM on 11.05.2017
