Hi Cida,

Please see the below article by the Guardian that Sarah found below. Similar to the Daily Mail article that went out recently – a lot of negative press on DECC's policy.

Can you please liaise with DECC Irrelevant information redacted by the RHI Inquiry to obtain lines to take on this, and circulate these lines to take to the enquiry team and Central Comms?

Many thanks,

Atika

There's an article in the Guardian today saying DECC are potentially wasting billions through the RHI by promoting boilers which are an inefficient technology.
Not good news!
