David,

I have reviewed the version of this paper which will go to the EPC, and attach my comments.

There are two comments that I would like you to confirm to me before finalisation (see attachment, SRC2 and SRC3).

As you know, we need to produce two versions of this paper – this one, for the EPC; and a version for GEMA. The GEMA one is a B-paper, for decision, with the relevant authority paper reference number. The content of the GEMA paper can be the same as EPC paper (aside from the italicised comment at the very start), but we need to insert it into a different template. Call me if you need a steer on this.

Thanks

Stuart Cook

Stuart

This is the pack of EPC papers that we've just given Bob.

Having seen your earlier email about you getting up early to review, Bob is going to try to go through the papers electronically rather than on paper, so hopefully avoid the need for you (or I) to subsequently incorporate comments from an email.

(We agreed I'd send you the [Sharepoint Link](#) to the folder where all the files live as well just in case)

I'll send you a separate email in a sec with a few other points about EPC.

Ashley
