Hi

I have had confirmation from Edmund that we can instruct Ricardo to conduct 8 NI audits asap. These will be full audits as per usual and there is no specific installation type required – so you can pick from the list etc.

Please let Anna-liisa know and get the ball rolling.

Also, I understand that Chris / Edmund have contacted DETI about clarifying their requirements and may go to Ireland next week to discuss the type / scope of audits in more detail. We can let Anna-Liisa know if she asks.

Thanks  
Mark

Hi Edmund and Mark,

Anna-Liisa has come back saying that they have the capacity to do another 4 audits in either the first or second week of March. Therefore 12 in total so far:

- Week starting 29 February – 4 audits
- First/second week March – 4 audits
- Week starting 28 March – 4 audits

We have already selected 4 post-accredited audits from the Audit Site suggestion log that are on the same site with different heat uses- two of them were accredited in 2013 and are chicken sheds and the other two were accredited last week and are heating the same work shop.

Please could you let us know if DETI have asked for a type of specific site that they would like to be audited so that I can prepare the audit packs and we can get the audits confirmed.

Thanks,
