One for us to consider urgently...not sure if we need James' view before we make final decision, Edmund?

Hi

As discussed, please see below response from Stephen Brimstone. The photos would indicate that there is no substantial indication to suggest that the building description he provided at application is incorrect.

Please confirm whether you are happy for Compliance to close this case.

Thanks

Mark

Please find attached as requested - fuel usage log, invoices and photographic evidence demonstrating usage of Agricultural workshop/shed. In the Spring this shed does be used to accommodate sheep during lambing if weather conditions demand so - pens are not constructed until they are needed - if you require me to construct the pens to take a photograph please let me know.

Please note as indicated on fuel usage log that by agreement I get my pellets from my father-in-law who has a large external bulk bin. I keep copies of the invoices for each load he has delivered before I take my pellets out. This ensures we reduce cost by having the one delivery.

Any further issues please let me know.

Regards,
 Stephen
