Dear Seamus,
The DSP has been signed at our end – I have attached the signed copy. Many thanks for working with us so proactively to enable this. Going forward our Data Manager, Marc Tichler (cc'd), is going to be owning this document, as well as managing the data sharing requirements that are specified in the DSP. He will be in touch with you to discuss the process for sharing data (such as dates etc) and will be the point of contact going forward on this and any other requests for data.
I hope this is helpful, please let me know if you have any questions.

Thanks
Atika

Many thanks for this revised draft DSP. I have discussed with Stuart and we are content with the document as drafted. I have accepted all the changes in your draft and deleted the comments so the document is now final as far as we are concerned.

Stuart has signed off for DETI.

Hopefully we can now have the DSP signed at your end and the issue closed off this week.

Many thanks

Regards

To: Hughes, Seamus

Cc: Omolade Barker; Edmund Ward

Subject: TRIM: FW: Data Sharing

Dear Seamus,

Thanks for sending me your comments on the data sharing protocol. Our legal team have since made some additional comments and additions, on the attached.

In particular:

- The statutory basis for entering into this DSP was not considered in the draft and it seems DECC's DSP was copied over re reporting obligation under GB regs. DETI would need to review the tracked changes in the attached to ensure that you agree with our comments/tracked changes re statutory powers. There is no provisions under NI RHI Reg for Ofgem to disclose information to DETI, so any disclosure has to be via the mechanism provided by Section 114 of the Energy Act 2011 (EA 2011) and Arrangements made pursuant to the EA 2011.
- For reason stated in bullet point 1 above, both Ofgem and DETI will need to consider what information is required to be disclosed under the Arrangement and when the disclosure should take place. I can set up a meeting on this if this is useful, or you could send us your data requirements for review?
- The expiry date of the DSP need to be considered in view of the provisions of the Arrangements on termination i.e. amendment of the NI RHI Reg will trigger termination of the current Arrangements.

Re SFTP I believe my colleague Steve has spoken to you about this. He advised that we don't have SFTP and are currently sending data via

Annotated by RHI Inquiry

a secure GSI email? Do you need anything else on this?

Re next steps on the protocol (please amend or add as appropriate)–

- 1) DETI to confirm they are happy with this draft and changes that have been made
- 2) Finalise security arrangements
- 3) Arrange for protocol to be signed.

Thanks

Dear Seamus,

Many thanks for this. Regarding your query below on secure file transfer, we are looking into this and will send you over these details in due course.

Regarding your other questions that you have highlighted in yellow, these look like internal observations DETI colleagues have made with regards the Data Sharing protocol draft that we previously sent over. We don't have any strong views with regards to these observations.

We recommend that you send us a tracked changed version of the data sharing protocol, which marks up any changes you would like to make. We can then review this clearly in the context of the full document. Does that sound possible?

Thanks

Atika

We touched on this issue in our telecon last week. My email to you on 18 July was really to seek your comments on the views expressed below, (relevant ones highlighted), from DETI Information Management Unit on the current draft document. There are comments in the draft document from Karen Wood, (I presume an Ofgem employee), which we can consider. I presume I am right in thinking that the draft protocol document originated from Ofgem?

An early response would be appreciated so that we can start to move this matter on.

Many thanks

Regards

Seamus

PS On the other matter we discussed have you been able to establish if Ofgem has/or will be producing statistical reports on the NI RHI similar to that produced for the GB Scheme?

Subject: NI RHI Carbon Trust and other matters - possible points for an SRO exchange of letters

Leo – I have taken a quick look at the draft data sharing agreement sent to Wai Kuen in order to facilitate data coming into Energy Branch using the SFTP facility.

Based on my experience, I've provided some comments below:

- There appears to be quite a bit of information to be provided. Is the sharing of all of it relevant and not excessive?
- As someone has already commented, the facility to ensure the secure transfer of the information should be included.
- In addition to FOI/EIR, there has to be arrangements in place to provide individuals with access to their personal data if they request it – subject access under the DPA.
- GEMA will likely have to include the sharing of any personal data with DETI within their ICO notification.
- How is DETI ensuring the information is held securely with restricted access? Flesh out 8(3).
- Have common retention periods for the data been agreed – this will have to be reflected in DETI's R&D schedule? These retention periods should be reflected in the agreement as opposed to stating the need to comply with retention and disposal policies.
- Should the detail in point 4 be within point 3?
- In point 4 replace 'data holder' with 'data controller'.
- Should point 6 and 7 be amalgamated and reduced – there's a lot of detail?
- A data sharing agreement doesn't actually have to list the principles (point 9). By all means include a reference that they will be complied with and the various issues throughout the agreement should cover the issues they pose but actually listing them only takes up space.
- What is meant by (point 8) 'DETI may also conduct checks of data quality across the scheme'? Is there any way to be more specific as to what this will involve?

As DIM, you should probably have another look at this when it is closer to final draft.

Dear Seamus,

I work in Edmund's team – specifically on policy/regulatory implementation for the Non-Domestic RHI. Edmund is on leave and he referred your enquiry to me.

In terms of an IT contact, can you/your colleagues liaise with Cheryl Fox (Cheryl.Fox@ofgem.gov.uk) in the first instance.

Regarding the type of data involved, this is in Annex A of the draft data sharing protocol that was shared previously. I've attached it again

Received from OFGEM on 18.10.2017

Annotated by RHI Inquiry

I hope this helps. Edmund will be back next week, but if you have any queries in the meantime feel free to get in touch.

Thanks

Subject: RE: NI RHI Carbon Trust and other matters - possible points for an SRO exchange of letters

Edmund

In terms of the data transfer issue, I can advise that DETI IT met yesterday (Wednesday) with the overarching NIS IT Group to further consider the secure file transfer system for which RHI will be a pilot project for DETI. It is looking like it will go ahead but our IT colleagues will require more detail on who will be transferring the data and the types of data involved. In this regard it would be helpful if Ofgem could provide detail on the nature of the data held and also a relevant IT contact within Ofgem who can liaise with DETI IT on the technical details.

Regarding the timetable for scheme changes it is still early in our internal consideration at this point so there is nothing definitive to advise at this juncture. However, we are fully aware of the need to keep everyone in the loop as the matter is progressed and we certainly be liaising closely with you and your colleagues on the matter over the coming time.

I hope this is helpful to you.

Subject: RE: NI RHI Carbon Trust and other matters - possible points for an SRO exchange of letters

Seamus, [Stuart, Davina]

Further to my previous, in preparing for any response from Chris to Stuart on the Carbon Trust matter, I just wanted to clarify where we are at a working level on the other matters that Chris and Gareth John previously discussed with John Mills.

Some of this is set out in the wider issue summary below - please do let me know if any of these are not in line with your understanding.

Picking up a couple of specifics:

-on data sharing I wondered if there'd been any update from your IT colleagues on the data transfer protocol?

-on regulatory/scheme changes, I wondered if your plans were any further advanced with respect to changes to the scheme and if, for example, you are yet considering a timetable over which regulatory change might occur? If so, we'd be happy to discuss the appropriate timescale for the feasibility study Ofgem would expect to conduct.

Thanks again for your input on these matters.

Kind regards,

Edmund
Received from OFGEM on 18.10.2017
Annotated by RHI Inquiry

Budgets

We have agreed a budget for 2014/15. In line with our agreed approach to review volumes on a quarterly basis, we look forward to providing an update following the recent completion of the first period April-June 2014. [I'm currently checking with colleagues here but I believe there is a timetable for this]

Data sharing

I understand our teams have reached a common view on the practical measures to be put in place to facilitate the secure sharing of data. In line with that, I understand that you will be providing a short note summarising how your data storage and secure transfer system will enable the data to be . Our teams will continue to progress this at a working level.

Future changes to the Non-Domestic RHI scheme

We will be happy to engage on further intended policy changes. We note that, in order to assess the scope of administrative and IT system changes, our normal expectation would be to complete a feasibility study at the stage you have a firm view of policy intentions. This would enable us to provide you with an assessment of costings and operational impacts of the proposal, and to indicate the likely implementation time once arrangements (including funding) were agreed.

Subject: FW: NI RHI Carbon Trust and other matters - possible points for an SRO exchange of letters

Dear Edmund
It was good to have the call last Wednesday which was helpful in getting myself and Stuart up to speed on the issues. Attached please find a draft letter which we would propose to issue to Chris but I wanted to share with you to make sure you are content before doing so. We have kept the draft succinct and focused on the main issue, the other areas can be addressed in due course.
We would hope to issue the letter today if at all possible.
Many thanks
Regards
Seamus
