Yes they will need to pull someone from the RHI team to cover this I think. Pretty much the lull before the storm for us at the moment. We'll need to be flexible come the autumn should we get ECO, Green Deal, FITs Comp Review, so happy to agree the best fit for you when the landscape is a bit clearer.

Completely agree on resourcing. Don't mind lending a hand – but they will have better placed people in the RHI team to do that (at present I'm not funding to provide any assistance and nor are they).

I've told Matthew I can't do it in 3 days a week – especially not if all the support around it has been stripped. I did suggest he should just promote me to oversee this and the exempt network which only brought out a chuckle unfortunately.

Jonah

Some points on costs:

Matthew said he wants a line of explanation against each of the cost heading

For consultancy he suggest we put in 8K for Deloitte report and 10K for technical consultancy RO bioliquids etc.

Ruth will be offering costs for legal in the morning. I have discussed with her about keeping them "realistic".

On staffing Matthew knows that I am keen that the Band C role does not fall to you – in any case it will need a full time person, so he may need to pull someone from the RHI team – having said that it is likely that you will need to help out (pending anything else that comes our way) during the early stages.

Happy to discuss and work with you and Marisa on this in the morning.

Keith
