I agree with all suggestions so far but would maybe add a 'current answer contains chicken / poultry' at HH120

Filter for 'poultry' in General Comments and QC comments boxes - these are often commented on at QC - won't be exhaustive but will be a reasonable proxy for a lower bound.

Check all the 99Kw applications – should tally! – Seriously I think you have the only mechanism, which would be by SIC code and then cleanse the data.

Good afternoon,

Please see Seamus's email below, I wanted to confirm prior to responding that the only information we can provide which may help to identify poultry farms is the business name, SIC code and description of how the heat generated is used. Please let me know if you are aware of any other data we hold which may be useful in identifying poultry farms.

Thank you

Marc

Subject: NIRHI Statistics - Applications for biomass installations

Good afternoon Marc

I wonder if you could help with some statistics to assist with our budget profile projections for the NIRHI. In the latest update report for the position @3 May 2015 there are a total of 614 biomass applications in the system. Would it be possible for Ofgem to indicate us how many of these are for poultry house installations?

If this could be provided it would be of great assistance to us.

Many thanks

Best regards

Seamus
