Promoting choice and value
for all gas and electricity customers

Differences between Assumptions in Feasibility Study and Current Situation.

- **Projected GB Accreditations in October 2011 reflect that NIRHI accreditations represents 3% take up against GB scheme. Reality based on current GB figures is that NIRHI represents around 17.5% of GB RHI.**
- **Time to accredit applications has increased substantially from [] to []**
- **Staff requirements to deliver RHI has increased significantly from that perceived to be the case when drafting the Feasibility Study.**
- **Given our early experiences of delivering GBRHI we are able to predict figures with greater accuracy and consider the efficiency saving that can be made as the scheme matures.**
