Hi there,

[REDACTED]
[REDACTED]
[REDACTED]

[REDACTED]
[REDACTED]
[REDACTED] our current customers are saving on average 30% of their heating bill.

We've been focusing on the local care home market, as their heating requirement and subsequently their bills are huge, so it was a good place to start and get established in, but we've also got further plans to branch into adjacent markets such as hospitality, education, other healthcare and government buildings.

I wondered if Arlene would be free any time to hear about what we do and for us to ask some advice on how we align the energy efficiency that we deliver with the sustainability delivered by RHI?

I look forward to hearing back from you. I've attached one of our most recent case studies for your reference.

Many thanks,

[REDACTED]

Hello Ariene,

[REDACTED] our current customers are saving on average 30% of their heating bills.

We've been focusing on the local care home market, as their heating requirement and subsequently their bills are huge, so it was a good place to start and get established in, but we've also got further plans to branch into adjacent markets such as hospitality, education, other healthcare and government buildings.

I wondered if you would be free any time to hear about what we do and for us to ask some advice on how we align the energy efficiency that we deliver with the sustainability delivered by RHI? Given the benefits of RHI we find that many of our potential customers are no longer worried about becoming more efficient, because they are now more sustainable. I firmly believe that the two should go hand in hand and would like to be part of making that happen.

I look forward to hearing back from you. I've attached one of our most recent case studies for your reference.

Many thanks,

Hello Mrs Foster,

[REDACTED]

our current customers are saving on average 30% of their heating

We've been focusing on the local care home market, as their heating requirement and subsequently their bills are huge, so it was a good place to start and get established in, but we've also got further plans to branch into adjacent markets such as hospitality, education, other healthcare and government buildings.

I wondered if you would be free at any time for me to come to your constituency office/Belfast/other at any time to hear about what we do and for us to ask some advice on how we align the energy efficiency that we deliver with the sustainability delivered by RHI? Given the benefits of RHI we find that many of our potential customers are no longer worried about becoming more efficient, in fact it pays them to use as much as they can - in fact the incentive to use more is leading to misuse in some cases. I firmly believe that energy efficiency and sustainability should go hand and I'd really appreciate 20-30 minutes of your time to see what you think.

Thank you for taking the time to read this. I've attached a brief flyer for your reference.
