Hi there,

my name is Janette O'Hagan and I'm co-founder of a local company called Okotech that has developed innovative energy efficient heating controls called heatboss. We won last year's Propel Company of the Year, so maybe you're aware of us, but just in case...

We developed heatboss specifically for retrofit into existing non-domestic buildings to make their heating smarter. heatboss is quick and easy to install and means that our clients only heat the rooms that they need at the time that they want and to the temperatures that suit each room's needs. By using heatboss, our current customers are saving on average 30% of their heating bill.

We've been focusing on the local care home market, as their heating requirement and subsequently their bills are huge, so it was a good place to start and get established in, but we've also got further plans to branch into adjacent markets such as hospitality, education, other healthcare and government buildings.

I wondered if Arlene would be free any time to hear about what we do and for us to ask some advice on how we align the energy efficiency that we deliver with the sustainability delivered by RHI?

I look forward to hearing back from you. I've attached one of our most recent case studies for your reference.

Many thanks,
Janette

heatboss
